### **Institutional Distinctiveness**

In 1975, with the objective of providing higher educational facilities to the students residing in and within the vicinity of the town of Dahanu, Dnyan Bharti Society was formed. With persistence and dedication of its members and the residents of this town, Senior College of Commerce and Senior College of Arts were started in the years 1981 and 1984 respectively. This helped the residents of nearly four adjoining talukas of the erstwhile Thane district viz. Dahanu, Talasari, Jawhar and Mokhada. The institute has a campus area of 9.39 acres.

The Society was founded and developed in the most adverse circumstances. Most of the students were the first generation learners from adjoining tribal areas. When the region didn't have many choices for higher education nor could the tribal residents afford to even dream of sending their children for higher education, as most of these tribal people were daily wage workers, this institution played a pivotal role in providing Bachelor of Commerce and Bachelor of Arts degrees. For over last four decades this institution has earned its reputation for being a premier institution in the rural-tribal belt of Palghar District (erstwhile Thane district) in the State of Maharashtra. Providing equal opportunities, without any discrimination is one of the basic objectives of the college. The institution played a role of catalyst in bringing about a radical change in the society.

This institution being a government-aided institution, gave its residents a ray of hope to shape the future of their next generation; the fruits of which can be seen after decades of continuous growth. The institute implements University Curriculum through well-planned and effective teaching-learning activities, blended with use of modern tools and platforms like Zoom, Google Classroom, etc. Over the years, Junior College for Arts, Commerce and Science and later BMS College were started too.

Along with academic progress of its students, the institute also believes in bringing the best out of its students by promoting co-curricular and extra-curricular activities. Whereas initiatives like NSS, majorly orient the students to community service, thus developing their personality and inner feelings towards community welfare; DLLE, a career oriented program, empowers students with work skills so as to increase his/her employability.

The aim of our institution is to make every student a responsible citizen of the nation.
